AUSTRALIAN BUTTERFLY SANCTUARY is the largest butterfly flight aviary and exhibit in Australia - an all-weather experience in the heart of Kuranda. Home to over 1500 magnificent tropical butterflies, you'll be enchanted by the aerial dynamics of these elusive wonders of nature as you wander through the aviary's rainforest gardens.

All butterflies are local rainforest species, including the electric blue Ulysses and the majestic green and yellow Cairns Birdwing butterflies.

GUIDED AVIARY TOURS detailing a butterfly's life cycle and behaviour are available at no extra cost throughout the day. Be sure to wear something bright (we recommend red, white or hot pink) and let these beautiful and colourful creatures flutter all over you as you wander through!

NEW BUTTERFLY PHOTO EXPERIENCE

Have your photo taken surrounded by beautiful Ulysses and Cairns Birdwing butterflies as a souvenir of your memorable visit to our gardens (extra cost).

BEHIND-THE-SCENES LABORATORY TOUR

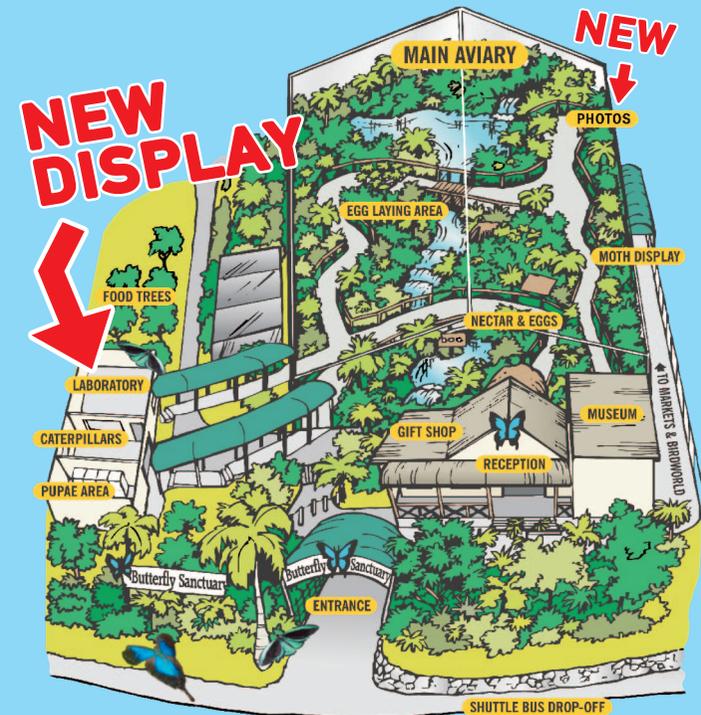

After walking through the aviary, your guide will take you to the breeding laboratory, which houses up to 4,000 caterpillars.

This interesting and educational experience provides an opportunity to view at first hand the breeding laboratory through special viewing windows, where you will see the caterpillars in their varying stages of development.

All of our butterflies are hand reared on the premises. To continuously stock the Butterfly Sanctuary, the laboratory staff collect and clean eggs, "hand-raising" the caterpillars right through to the chrysalis stage, until they are released as butterflies into the Sanctuary.

After your tour, see butterflies from around the world in the museum exhibit.

A NEW MICROSCOPIC DISPLAY is now included in the "Behind-The-Scenes" Laboratory Tour. The device is connected directly to a computer via USB, turning it into a great tool for exploration of our butterflies! The digital camera captures video and images, shown on a large screen so visitors can view the anatomy and structure of several different rainforest species up close. Observe the tiny scales that produce the iridescent electric blue colour of the Ulysses, and the bright yellow abdomen and red thorax of the Cairns Birdwing.
